

CREATE A YOUTUBE CHANNEL, UPLOAD & SHARE

Youtube will be important as we move forward as it is a common place to load videos and link them into Google Classroom or our Remote Learning Platform. Here are some quick steps to set this up.

As part of today's professional development, we are asking you to create a YouTube channel, upload any video, and share that video to any website, document or platform.

STEP 1: Watch this [6 minute video](#) showing you how to create a YouTube Channel and Upload / Share Videos.

STEP 2: Open [YouTube](#) and Sign In (you can use your faculty account).

STEP 3: Click your name icon and hit **Create Channel** – name your channel.

STEP 4: Click **Upload Video**. Select a video to upload. Change the **Privacy Settings** to public or unlisted. **Copy the YouTube Link**.

STEP 6: **Link the Video** somewhere – in a word document, on google classroom or any other platform.

**Please email Shelli or I if you have trouble. This should take somewhere between 10-45 minutes. If you go beyond that, let us help you!*

You don't need to submit anything today.

If you already have a YouTube Channel and know how to do this process, you do not have to do these steps. **You may want to watch the first 2 minutes of the video though because they're funny (stop after the video within the video).*
